

Revolutionary PadHead™

polishing & grinding head

- Velcro attachments for most common wet polishing pads and abrasives.
- Maximize production and quality on your radial arm or single head bed polishing machines.
- Up to 50% faster using conventional wet diamond pads than traditional abrasives and plates!

Miles Supply's PadHead™ *polishing & grinding head* is the most unique tool on the market for surface treatments.

Some models are designed to polish or hone flat surfaces. Model I works great on serp tops. They all utilize multiple free rotating heads working off of the resistance of friction principle to accomplish its superior surface cutting action.

Model I

Used by Countertop Producers, Restoration Contractors, Monument Manufacturers, Slab Producers, and Concrete Polishers.

Utilize your CNC machine for top polishing or honing with the spring loaded Model C.

Model C

**Granite
Marble
Limestone
Bluestone**

**Engineered Stone
Sandstone
Concrete**

Model II

U.S. & International Patents
